

FOR IMMEDIATE RELEASE

IGM Resins, Brandt Technologies Announce Distribution Agreement

17 September 2018 - IGM Resins has appointed Brandt Technologies, LLC as its Midwest distributor for their broad line of UV / EB radcure products. IGM Resins is a leading global manufacturer of photoinitiators, oligomers, monomers, additives and other customized specialties to the UV radcure industry. Brandt Technologies, LLC's territory for IGM products will include IA, IL, IN, KY, KS, MI, MN, MO, and OH. "Partnering with IGM Resins is an important part of our growth strategy as a supplier to the UV / EB radcure market," said Ben Hotchkiss, President of Brandt Technologies, LLC.

About IGM Resins

IGM specializes in the development, manufacture, and supply of products and technical services to the global UV coatings and inks market. IGM develops, produces, and distributes a full range of radiation curable materials including photoinitiators, acrylate oligomers and monomers, and additives from manufacturing facilities in Europe, Asia, and the US, supported by technical labs in each of these regions to help create next generation energy curable coatings and inks. About Brandt Technologies

With roots dating back to 1894, Brandt Technologies has grown consistently to become one of the major specialty chemical distributors in the Midwest. We have expanded our core markets to include paints, coatings, graphic arts, adhesives, plastics, composites, rubber, agricultural products, concrete admixtures and related markets. Our growth over these many years has been fueled by representing innovative companies who consistently introduce new products to our markets.
